THE DENTAL ADVISOR™

www.dentaladvisor.com

Making Sense of CAD/CAM

By the end of training, sales professionals will be able to answer the following questions:

- Why should a Doctor or Laboratory consider integrating CAD/CAM?
- Which system is the best?
- What are the differences between digital impressions and CAD/CAM?
- Does CAD/CAM help Dentists and Laboratory Technicians with productivity?
- Which systems work with which materials?
- How successful are these materials in the mouth over time?

THE DENTAL ADVISOR is the only facility in that can offer a comprehensive training experience on all areas of CAD/CAM Dentistry. We are currently training sales professionals on the advantages of CAD/CAM in a dental practice.

Attendees will have the opportunity to view live scanning, milling, and seating of restorations in a busy dental practice, as well as visit a cosmetic laboratory and milling center. All major CAD/CAM systems will be reviewed!

Attend this 2 day course to:

- Learn the differences in CAD/CAM
- Know the materials used in CAD/CAM
- Interact with all personnel utilizing CAD/CAM (Dentists, Assistants, and Lab Techs)
- Take home valuable materials to provide to your customers
- Observe hands-on how each of the systems work
- Understand the advantages and disadvantages of each system

THE DENTAL ADVISOR™
