The Advisor's Assistant

Submit a question – No question is too big...no question is too small. Feel free to let them fly my way and if I cannot find the answer...I have plenty of great minds on THE DENTAL ADVISOR campus that are ripe for the picking!

Tell us your **area of interest** – This is your spot to share your ideas, tell us what your interests are or let us know what you would like to see more of. You never know...your idea may very well become our next Main Topic!

Continuing Education – Jennifer Ireland is available to personally speak to your team or group! Interested? Please complete the form below and click “Send Request” to forward your inquiry. We will respond as promptly as possible. Or Contact Craig MacFarlane at 734-665-2020 ext.111

Current Course List

The Active Assistant– The Key Ingredient to the Successful Dental Practice - 3CE

Today's dental assistant is more active and pivotal to the success of the dental practice than ever before. With the advancement of technology, the skills necessary to sustain excellence in dental assisting are expanding at a rapid rate. Knowing ones strengths and opportunities for growth increases both efficiency and effectiveness. The focus of this lecture will be on the importance of the individual to maintain a superior skill set and knowledge base to be both successful team members and to provide exceptional patient care.

Maintaining the Motivation: A Team Approach to Inspired Dentistry - 3CE

This educational and interactive lecture is designed to encourage and inspire the entire dental team toward greater personal and professional success. Team members will learn how to incorporate effective habits into everyday practice. We will focus on providing patients with the best possible dental experience complete with competence, consistency, kindness and continuity resulting in sustained dental excellence.

Waving a Wand and Going Digital - 1CE

This is an introductory course to CAD/CAM dentistry designed to educate and motivate the dental assistant. Assistants will learn the difference between scan-only and complete CAD/CAM systems. Emphasis will be placed on the importance the motivated dental assistant with regards to successful integration of digital dentistry.

CAD/CAM with Assistance - 1CE

This is an advanced course for teams incorporating digital dentistry into their practice. It is designed to educate and motivate the entire dental team toward successful integration of CAD/CAM technology. Team members will learn the importance of their individual roles with regard to success and sustained excellence.

Active Responsibility - 1CE

This lecture is designed to encourage and inspire the entire team toward greater personal and professional success. Team members will learn the importance of taking an active role on their road to sustained excellence and advancement.

Team Awareness- 1CE

This lecture is designed to encourage and inspire the entire team toward greater success as individuals and as members of a team. Team members will learn the importance of taking an active role and maintaining awareness with regards to patient care, time management, case acceptance and production.

Cultivating Networks of Support - 1CE

This lecture is designed to educate the entire team as to the importance of building and maintaining internal and external networks of support. Emphasis is placed on the importance of sustained collaborative partnerships through continuous and active communication.
