Presented by Sabiha S. Bunek, DDS

It is often challenging for clinicians to keep abreast of the vast array of materials and equipment on the market. In this course, you will learn which products received high accolades in their particular product category as well as those products that have been identified for solving a particular clinical challenge. For over 30 years, THE DENTAL ADVISOR has provided the dental industry with trusted information on products and equipment. Participants will leave with a valuable update on the latest products and techniques to take back and implement into daily practice for saving time, minimizing stress and maximizing productivity.

Course Objectives:

During this course, Attendees will:

• Understand the process by which products are chosen for awards or as clinical problem solvers.

• Understand products that solve common clinical challenges or that simply increase efficiency and effectiveness.

• Learn about the latest products including features, advantages and techniques for successful clinical use.

• Gain a better understanding of new and exciting areas in dentistry and how to educate themselves and their teams.
