

July 15th 7-8 am EST & 7-8am PST

# DENTAL ADVISOR Insights

**Ona R. Erdt**  
DMD, MSHS, CDA

### About the Instructor

Celebrating a diverse 19-year career in dentistry, Dr. Ona coalesces her experiences as a dental assistant, dental educator, dentist, dental product evaluator and clinical editor into one unique viewpoint. Dr. Ona graduated in 2002 with an AAS in Dental Assisting. It was there that a love affair with all things dental was born. Always wanting to learn more about the art and science of dentistry, she went on to graduate from dental school. She obtained her DMD as well as completed an MSHS degree, majoring in Health Professions Education, from Western University of Health Sciences in Pomona, CA. After practicing dentistry with Indian Health for a number of years, she now practices part time in a private practice in Saint Johns Michigan and brings her diverse experience and passion to the position of Clinical Editor at DENTAL ADVISOR.

### Course Description

**Clinicians and their teams are constantly introduced to new products and equipment.** For over 35 years, DENTAL ADVISOR has provided trusted clinical evaluation and independent scientific research to the dental community. Our Editors meet to discuss products, equipment and research, and now invite the general public in for discussion of products and relevant research. Each session will include product introductions, which discuss current products being evaluated clinically by volunteer practicing dentists, review of independent research performed in DENTAL ADVISOR Laboratories following ISO and ASTM standards, and clinical review of products in practice.

### Learning Objectives:

**After attending this course, participants will be able to:**

- Explain the science behind dental materials, products, and equipment clinically evaluated.
- Explain the science behind research performed at DA independent biomaterials testing facility.
- Recognize common clinical advantages and disadvantages behind dental materials, products, and equipment presented.
- Troubleshoot how to resolve common clinical issues seen with these materials through peer-to-peer clinical experiences.
- Recognize how to utilize this knowledge to increase successful clinical outcomes.
